

CIRSET, The Committee for Immunization Registry Standards in Electronic Transactions, is a peer based review group comprised of registry technical staff, registry managers, immunization programmatic staff, CDC Immunization Registry partners, software vendors and agency partners. CIRSET sponsors the adoption of the current standard for electronic exchange between registries and partner systems, the evaluation and recommendations about new and emerging standards, coordination and collaboration and recruitment of software vendors and provides information and guidance about the operational challenges of registry to partner system electronic exchange. CIRSET works closely and in collaboration with the American Immunization Registry Association, AIRA, to coordinate approaches to the challenges of electronic exchange and share important information in a common web based knowledge area. CIRSET has a web work domain under which messages, document posting and discussions are fostered. CIRSET supports a number of permanent and temporary workgroups including the Standards Review Workgroup and Vendor Relationships workgroups. State and regional immunization registry projects are invited to sign the CIRSET Letter of Intent to become official members. Participation is open to all interested parties. Interested parties are invited to see the CIRSET web page at www.CIRSET.org <<http://www.CIRSET.org>> to find out more about CIRSET and to become a member or participant. The contact for CIRSET as of the winter of 2003-2004 is: Dennis J. Michaud.
